

CHRONIC HEALTH ISSUES? YOUR GUT MAY BE AT FAULT.

Most of your immune system is in your gastro-intestinal tract. You can improve your health and treat chronic conditions by partnering with your clinician on a wellness program that includes insightful diagnostic testing, lifestyle changes, and quality nutraceuticals.

CONSIDER TAKING THE GI-MAP TEST IF YOU HAVE THE FOLLOWING CONDITIONS/SYMPTOMS:

- **GI Issues** (Bloating, Constipation, Diarrhea)
- **IBS** (Irritable Bowel Syndrome)
- **IBD** (Inflammatory Bowel Disease)
- **Bacterial/Parasitic Infections**
- **Anxiety**
- **Depression, Stress**
- **Weight Management & Obesity**
- **Diabetes**
- **Allergies**
- **Auto-Immune Disorders**
- **Hormonal Issues**
- **Brain Fog**
- **Other Chronic Health Issues**

Why The GI-MAP Test

- GI-MAP helps assess specific microbes that may disturb your microbiome and trigger digestive and gastrointestinal issues and/or other chronic health conditions.
- Safe and Easy – only requires one stool sample.
- GI-MAP is the latest DNA-based stool test utilized by functional medicine practitioners. It provides actionable test results that lead to a treatment plan tailored to address your health and chronic conditions.

Contact your clinician and request the GI-MAP test today!
